

[Super MP3 Converter 6.2.7](#)

1. Load video/audio to Super MP3 Converter

The screenshot shows the Super MP3 Converter application window. The interface includes a menu bar with "Add File", "Edit", and "Clip". Below the menu bar is a list of three items to be converted: "SPRING...J0.WMV" (3840\*2160, 00:02:45), "Clip0005.MXF" (3840\*2160, 00:00:06), and "test5.mkv" (1920\*1080, 00:07:32). Each item has a play button icon, a format dropdown menu, and a "Convert" button. A "Preview" window on the right shows a video frame with the text "A BLUE SKY STUDIOS PRODUCTION". At the bottom, there is a "Profile" dropdown menu set to "MP3 - MPEG Layer-3 Audio (\*.mp3)", a "Destination" field, and a large blue "Convert" button. Red arrows point from the text annotations to the "Add File" button, the "Profile" dropdown, and the "Convert" button.

2. Choose video/audio formats from here

3. Convert to MP3 and more
