The data is in the form of a list

of strings, so the date is the last item in the row: df = pd.DataFrame({"ID": [1,2,3], "ColumnA": ['string','string'], "ColumnB": ['string','string'], "ColumnC": ['string','string']}) I need to add the date (in the form of a string) to the end of each row. The output would be: df = pd.DataFrame({"ID": [1,2,3], "ColumnA": ['string','string'], "ColumnB": ['string', 'string'], a1d647c40b
