About This Game

An interactive fiction adventure-strategy parody. Send agents on missions, build your base, research occult superweapons and buy units. Along the way, unlock occult mysteries. Plus romance Kelly from Mass Effect. You play the demo now for free.

The demo is very much in an alpha state. After feedback both good and bad, the game is being substantially improved and the new demo will release later this year. I appreciate if you wish to try the game out. However, it currently has a confusing plotline and game mechanics that are being worked on.

This is a screenshot from the beta, due out September 2018:

TEMPLAR ARMOURY: TACTICAL

We are improving our agents' *tactical gear*.^{space} The optimal outcome is them not mimicking battlefield tactics from Starship Troopers, or at least wearing more than hockey pads when they do. As always, tell us how to do our jobs:

❖ Slow-mo Reload ¹

Flight of daggers.

❖ Be Cooler Bruce ²

The shark repellent bat spray.

❖ Cross the Streams ³

That of a giant slor!

❖ Dig Dug ⁴

Like Minecraft but crappier.

Press F to romance Kelly from Mass Effect.

RAIDER SQUAD

Ruthless, pretty in darkest pink and packing miniguns and rocket launchers (so they're the Sardaukar, basically), Phoenician Raiders are among the best soldiers in the secret world. Except nobody likes them.

Still, being former mundane special forces, these amphibious shock troops will easily dispatch any Illuminati opposition on the call of our agents. Their ruthlessness should also come in handy when we want to deny responsibility—just don't be surprised if they turn on us in the act.

◆ Increases War Readiness by +2
Costs 2 Firepower.

Current unit strength is 2.

The Third Age—was the pinnacle of human achievement. Since that time, we have devolved into a species of below-average intelligence.
