

[Jrebel License Crack](#)

A screenshot of the NetBeans IDE Plugins window. The window title is "Plugins" and it has a search bar at the top right. Below the search bar are tabs for "Updates (1)", "Available Plugins (175)", "Downloaded", "Installed (52)", and "Settings". A "Check for Newest" button is on the left. A table lists various plugins with columns for "Install", "Name", "Category", and "Source". The "JRebel NetBeans IDE Plugin" is selected and highlighted in blue. To the right of the table, the details for the selected plugin are shown, including its version (5.6.3.1), author (ZeroTurnaround), date (9/18/14), source (Plugin Portal), and homepage (http://www.zereturnaround.com). A "Plugin Description" section follows, explaining that JRebel is a productivity tool for seeing code changes without redeploying. At the bottom left, an "Install" button is visible next to the text "1 plugin selected, 26MB". At the bottom right, there are "Close" and "Help" buttons.
