Packages > Packages > New Package

PACKAGE TYPE

Fixed

Fixed Packages allow you to create packages with a fairly simple pricing structure, allowing your customers to choose poses from among their proofs in specific sizes. Fixed Packages work best when the number of poses is equal to the number of images in the package for example, or when a package consists of several sizes of the same pose.

Flexible

Flexible packaging allows you to create packages based on unit type pricing structures, or packages where the number of poses a customer can choose for the package may not be the same as the number of prints in that package. An example of this would be packages that allow a customer to choose two poses for a package with ten prints total, and then designate which pose to use for each of the ten prints.

Digital

i Not supported in Legacy Builder.

Digital packages allow the client to purchase digital versions of the images, which they can download after payment is received.
