[Factorytalk View Studio Serial Numberl](#)

User Identification and serial number

If you are installing FactoryTalk View Studio ME, the next step is to set up user information for the administrator of the application.

User Name and **Organization** are optional and not required for installation. A serial number reveals which edition of FactoryTalk View you purchased. Valid serial numbers are important to get activation keys and call Technical Support. If you do not enter a valid serial number, you are still allowed to proceed with the installation. Serial number information is available from the product packaging.

Enter the serial registration information and click **Next**.
